# The problem

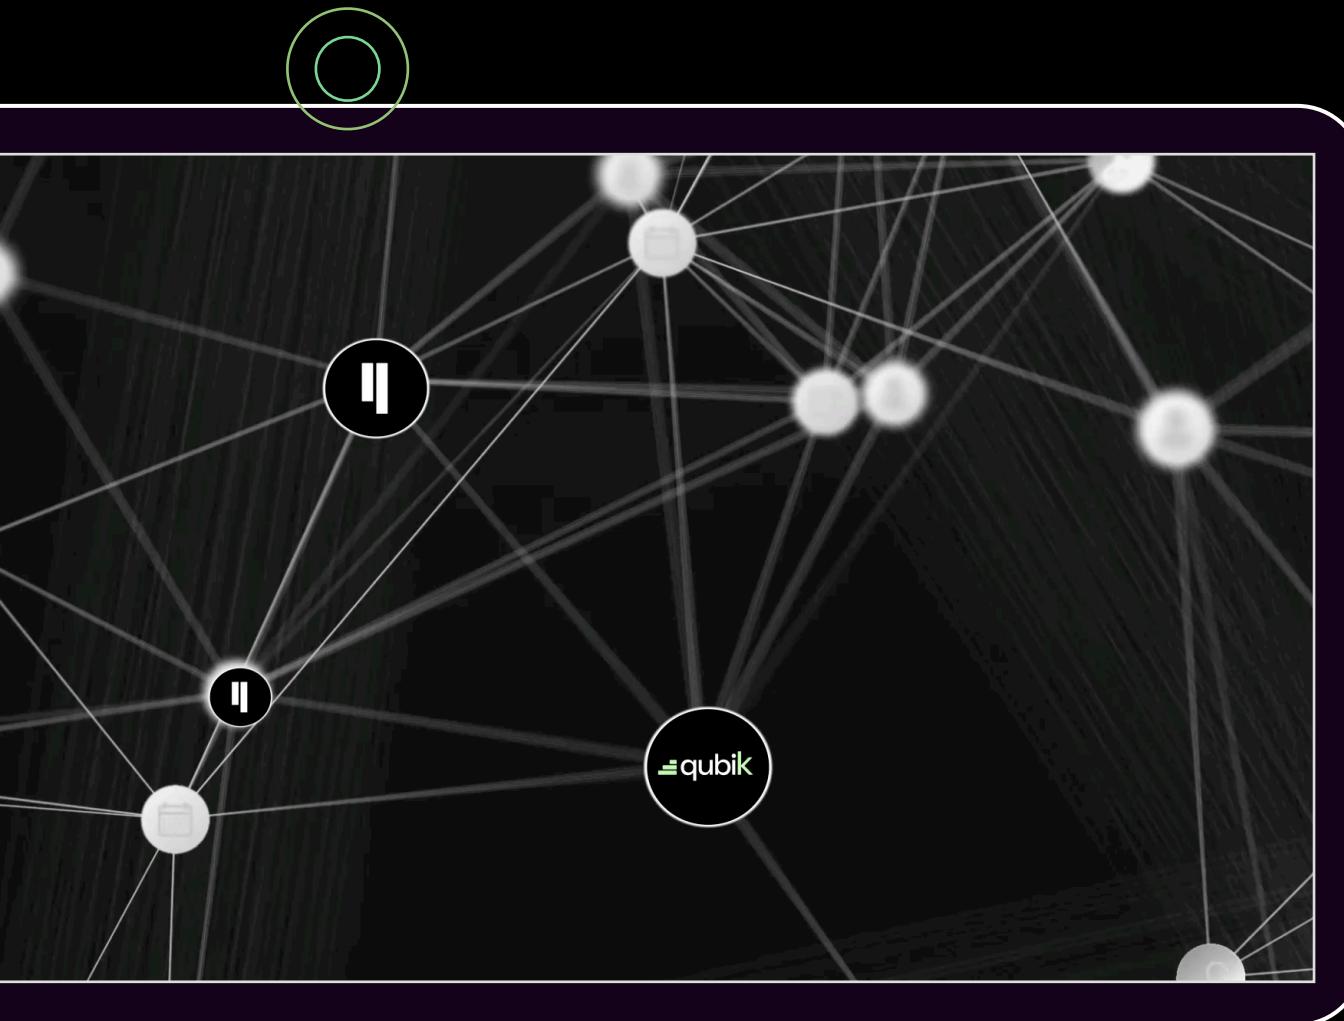

**Qubic is amazing, but out of reach for most users.**

The complexity of interacting with Qubic is blocking its growth.

Developers can't easily integrate it into existing tools, and non-technical users are locked out.

Moreover, the Total Addressable Market in Qubic is still very tiny.

xxxx

## Our solutions.

QubiK is a native module for **Make**, the leading low-code automation platform.

It allows anyone to connect Qubic to real-world applications — in minutes, and without code.

# Why Make?

**Trusted by 1M+ users. Integrated with  
1,600+ apps.**

Make is the “glue of the Internet”, with  
an intuitive drag-and-drop interface.

It democratizes automation for users  
at all technical levels — at a lower  
cost than Zapier.

## Nevtrace team

**10 years building with blockchain.**

At NevTrace, we help businesses unlock blockchain potential and scale onchain projects beyond early adopters.

QubiK is our answer to Qubic's real-world adoption challenge.

# Let's make the world qubiK.

**QubiK bridges Qubic with the world – no code, no friction, no limits.**

Join us in scaling one of the fastest and most powerful blockchains out there.

# THANK YOU

This is just the beginning of  
something very QubiK.
